

# SCALE FOR PROJECT FT\_TRANSCEDESCENCE (/PROJECTS/FT\_TRANSCEDESCENCE)

You should evaluate 3 students in this team

Git repository

git@vogsphere.42paris.fr:vogsphere/intra-uuid-622821be-6b54-4ce3-819

## Introduction

Please comply with the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the student or group whose work is evaluated the possible dysfunctions in their project. Take the time to discuss and debate the problems that may have been identified.
- You must consider that there might be some differences in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade them as honestly as possible. The pedagogy is useful only and only if the peer-evaluation is done seriously.

## Guidelines

- Only grade the work that was turned in the Git repository of the evaluated student or group.
- Double-check that the Git repository belongs to the student(s). Ensure that the project is the one expected. Also, check that 'git clone' is used in an empty folder.
- Check carefully that no malicious aliases was used to fool you and make you evaluate something that is not the content of the official repository.
- To avoid any surprises and if applicable, review together any scripts used to facilitate the grading (scripts for testing or automation).
- If you have not completed the assignment you are going to evaluate, you have to read the entire subject prior to starting the evaluation process.
- Use the available flags to report an empty repository, a non-functioning program, a Norm error, cheating, and so forth.  
In these cases, the evaluation process ends and the final grade is 0, or -42 in case of cheating. However, except for cheating, student are strongly encouraged to review together the work that was turned in, in order to identify any mistakes that shouldn't be repeated in the future.
- Remember that for the duration of the defence, no segfault, no other unexpected, premature, uncontrolled or unexpected termination of the program, else the final grade is 0. Use the appropriate flag.  
You should never have to edit any file except the configuration file if it exists. If you want to edit a file, take the time to explicit the reasons with the evaluated student and make sure both of you are okay with this.
- You must also verify the absence of memory leaks. Any memory allocated on the heap must be properly freed before the end of execution.  
You are allowed to use any of the different tools available on the computer, such as leaks, valgrind, or e\_fence. In case of memory leaks, tick the appropriate flag.

# General instructions

## Preliminary tests

- Any credentials, API keys, environment variables must be set inside a .env file during the evaluation. In case any credentials, API keys are available in the git repository and outside of the .env file created during the evaluation, the evaluation stop and the mark is 0.
- Ensure the docker compose file is at the root of the repository.
- Run the "docker-compose up --build" command.
- Since the rating of this project is more flexible, do not stop the evaluation process unless you encounter a 500 error, a crash, or anything that actually doesn't work within the project scope.

 Yes

 No

## Basic checks

- The website is available.
- The user can subscribe on the website.
- Registered users can log in.
- The website is a Single Page Application. The user can use the "Back" and "Forward" buttons of the web browser.
- You can browse the website using the latest version of Chrome.

 Yes

 No

# The website

## Security concerns

- Ensure that the website is secured.
- Be carefull about TLS. If there is a backend or any other features, it must be available.
- Check if there is a database the passwords must be hashed.
- Check the server for server-side validation/sanitization on forms and any user input.
- If there is any error, the evaluation ends now.

 Yes

 No

# The game

## Local game

- You should be able to use this game locally on the same computer using the keyboard.
- Each player should be able to utilize a section of the keyboard.
- You must also be able to initiate a tournament, and the tournament should offer a matchmaking system to connect local players.

 Yes

 No

## Gameplay

The game itself must be playable and respect the original Pong game.  
The controls must be intuitive or correctly explained (with some rules or manual). When a game is over, either a kind of end-game screen is displayed or the game page just exits.

 Yes

 No

## Lags & disconnects

Unexpected disconnections and lags have to be handled. The game and the website must not crash when a user is experiencing lags or is disconnected.  
Handling such issues in an efficient way is appreciated but not mandatory:

- Pause the game for a defined duration.
- Disconnected users can reconnect.
- Lagging users can catch up to the match.
- And so forth. Any solution is acceptable. The only requirement is: the game should not crash.

 Yes

 No

## Modules

*For this section, it is crucial to thoroughly read the PDF document detailing the requirements for each module, and provide clear and precise explanations for each choice made. In case of any doubt, do not hesitate to stop.*

### Major module 01

You must now verify the chosen module(s) with each group participant.  
You must comprehensively understand everything that will be explained, with the subject PDF as your reference. The obligations for each module are clearly stated in the subject's PDF.

Do not hesitate to ask any questions and request a demonstration of the proper functioning of these module(s).

As a reminder, one major module is equivalent to 2 minor modules, as specified in the subject.

A module is considered valid under the following criteria:

- There are no issues with the proper functioning of the presented module(s).
- We understand how it works and why it was chosen.
- No errors are visible
- A comprehensive explanation allows for a detailed understanding of these module(s).

We would like to remind you that this is an important project, and that it is essential to carry out this evaluation properly.

 Yes

 No

### Module 02

You must now verify the chosen module(s) with each group participant.  
You must comprehensively understand everything that will be explained, with the subject PDF as your reference. The obligations for each module are clearly stated in the subject's PDF.

Do not hesitate to ask any questions and request a demonstration of the proper functioning of these module(s).

As a reminder, one major module is equivalent to 2 minor modules, as specified in the subject.

- No errors are visible
- A comprehensive explanation allows for a detailed understanding of these module(s).

We would like to remind you that this is an important project, and that it is essential to carry out this evaluation properly.

✓ Yes

✗ No

Bonus

Evaluate the bonus part if, and only if, the mandatory part has been entirely and perfectly done, and the error management handles unexpected or bad usage. In case all the mandatory points were not passed during the defense, bonus points must be totally ignored.

Extra Module

You must now verify the extra chosen module(s) with each group participant.  
You must comprehensively understand everything that will be explained, with the subject PDF as your reference. The obligations for each module are clearly stated in the subject's PDF.

Do not hesitate to ask any questions and request a demonstration of the proper functioning of these module(s).

As a reminder, one major module is equivalent to 2 points. One minor module is equivalent to 1 point.

A module is considered valid under the following criteria:

- There are no issues with the proper functioning of the presented module(s).
- We understand how it works and why it was chosen.
- No errors are visible
- A comprehensive explanation allows for a detailed understanding of these module(s).

We would like to remind you that this is an important project, and that it is essential to carry out this evaluation properly.

Rate it from 0 (failed) through 5 (excellent)
